

WINTER SAFETY

Report all capsizes between May and September. The cold water is an increased safety risk.

A white light must be visible on your boat between the hours of sunset and sunrise

Make sure you have appropriate layers on before heading out! Gloves, thermals and beanies are the key!

Train with a friend, coach or in a crew boat - don't go out alone!

WHEN IN DOUBT, DON'T GO OUT! STAY SAFE ON OUR LAKES
